

FeelInGlass® Reflective Blade for HUD

► 應用 Applications

Widely used as an alternative to automotive cluster displays and Center Information Displays.

廣泛應用於車用儀表顯示與中控顯示的替代方案

► 特點 Features

- This hybrid configuration bridges the gap between conventional AR-HUDs and traditional display setups.
此混合式架構銜接傳統AR-HUD與一般顯示系統之間的應用差距
- The Reflective Blade functions as a panoramic black-mirror panel, independent of the windshield, projecting essential content within the driver's field of view.
Reflective Blade可作為全景式黑鏡面面板，獨立於擋風玻璃之外，將關鍵資訊投影於駕駛者的視線範圍內
- It enables new possibilities in display system integration by combining premium finish, seamless appearance, and crystal-clear rendering.
透過結合高質感外觀、無縫整合設計與清晰銳利的顯示效果，為顯示系統整合帶來全新可能
